

Do you have an external site and are worried about your security not being up to scratch?

Black Diamond Security have a rapid response system on a small scale, this is completely self sufficient and runs internal batteries, provides a visible deterrent and works in harmony with other security services such as your guards.

## Security Management

BD eyes system have their own battery.

Eyes are designed and built with size & presence in mind to create a visible deterrent.

Their primary function is for external sites & structures.

Any alarms go directly to a video response centre and are evaluated.

A Black Diamond Security response team will be dispatched if needed.

Eyes have a quick install time frame.

## Technical Specification

- ◆ European EN50131 grade 2 standards.
- ◆ Built with anti-vandal detection sensor.
- ◆ Robust housing to protect hardware and control systems.
- ◆ One – year battery life.
- ◆ Allows for 10 seconds of video.
- ◆ Wireless system.
- ◆ Motion activated system.
- ◆ Powered by 4 lithium batteries for extended battery life.
- ◆ 90 Degree multi-purpose lens as standard
- ◆ 4 infrared LEDs for 12m night vision
- ◆ Standard detection distance (up to 12 metres)
- ◆ Fully weatherproof (IP65) and temperature resistant (-20C/ +60C)
- ◆ Wall, cover and movement tamper triggered by tilt sensor
- ◆ Transmits check-ins/status signal every 8 minutes
- ◆ 3 wired programmable outputs

◆ PROTECTION ◆ PEOPLE ◆ PROPERTY ◆ PLANT
