

Surveillance is a priority for any site, whether it be your residential property or your offices. 24/7 fixed CCTV offer the latest in technology for the monitoring of your site.

The use of CCTV on your site or property provides a highly visible deterrent to potential intruders, whilst allow you to see at any given moment, who is on your site.

"We like to use the best brands on the market – dependent on your site we will chose from a range of options that will suit your security needs best"

## Security Management

Black Diamond Security offers a range of CCTV systems, which cover the fundamentals of surveillance:

- ◆ Analogue systems
- ◆ Digital HDIP/SDI systems
- ◆ Digital TVI systems
- ◆ PTZ CCTV systems

Feel free to contact us for more information on the types of surveillance available.

All cameras use advanced infrared technology, designed to give smooth, even illumination.

Our CCTV systems have been tested rigorously to deliver optimum CCTV footage in extreme lighting conditions.

## Technical Specification
