

Intruder alarms are designed to scare off potential burglars, thieves, and intruders. Our alarms are designed to provide a high decibel of noise when tripped. Alarms are cheap and relatively effective at keeping your property secure and keeping expensive equipment from being damaged or stolen.

Security Management

We offer a range of alarms all built in house by our technology team.

The alarms are designed to be pet-friendly, featuring loud alarms and sensor flashes to alert the area. The chosen brands effectiveness is well-known to would be burglars & thieves.

Alarms can be armed in part or by specific sectors to increase your control over your site. A variety of optional alert modes is available for programming.

Remote monitoring and connected directly to our monitoring centre, alarms will never be ignored.

A full warranty is providing with each alarm.

For both permanent or none permanent systems.

In response to an alarm, one of the following will be contacted:

- ◆ Yourself
- ◆ Your nominated key holders
- ◆ UK Police
- ◆ UK Fire Brigade (optional)
